CIS 4973 Jan 11, 2012

Programming in C, everyone should be okay in the class, sadly no liberal art people to easily influence...
Cause all cs guys have already established bad habits…

http://carmine.se.edu/kfrinkle/teaching/current/CIS4973/CIS4973.html <- Syallbus, course outline, kraken log in info, helpful stuff for the course, etc…

http://littlefe.net/ <- Super Computer Main Website

Programming in a Unix environment
MPI is what we'll be using on top of C, so get used to C…

Matrix multiplication is one of the key things we'll be doing this whole semester.
Step 0. Get the code
Step 1. Speed up the code
Step 2. ????
Step 3. Profit
