$\begin{array}{c} \textbf{Math 1513 - College Algebra} \\ \textbf{Quiz} \ \#14 - 2016.10.19 \end{array}$

Name:	

Find all the *potential* rational roots of the polynomial $p(x) = 6x^5 - 23x^4 + 3x^3 + 41x^2 - 9x - 18$. (Note: you do not actually have to find the ones which work.)
